Chapter A Director

From the desk of Dean Jernigan

Hello everyone, Wow, May is here already! The West Wing 1 was a blast. There was plenty to do and the rides were booked solid. Jeffery Goldin and the Region Staff did a wonderful job with the talent show. If you missed that you missed a first class production, I look forward to next year's talent show. The Motorist Awareness Division booth at the fair was a great success. They managed to give away all the T-shirts in one weekend. There was still plenty of other goodies for the rest of the week to bring people in so that we could raise their awareness and make sure that they Look Out For Motorcycles. The dinner at Mama Louisa's was well attended as we supported one of our long time newsletter advertisers. The Mini poker run was fun. Thanks Steve and Laurie Williams for sponsoring it. That was one of the last rides this season before we have to start considering wearing cool vests. The flora and fauna in the Arivaca area was marvelous. On the poker run we saw a Red Tailed Hawk the size of a large Owl, watching the road waiting for a stray calf to eat. Well we did get to Chapter K's meeting to save Alphie, He was a little sad to leave, He has grown fond of Kodie, but he is doing fine enjoying his bachelor life laying on the sofa, reading Wing World and planning his next ride. This has been another great month, thanks Chapter A!

Ride Safe!

Dean G. Jernigan

AZA-A Chapter Director

April 25-09

Ride to Chapter K-meeting

Rescue Alphie, Chapter A's Mascot

Alphie is popular, as a lot of Chapter A came to his rescue. Kodie was sooo sad to see him leave. I am sure they will see each other before long.

Good meeting.

We met at 11AM at the Tanque Verde/ Catalina hi-way McDonalds, for the ride up Mt. Lemmon. Had 5 bikes. Bob Berry rode to Windy point and then returned for another event. The rest of us rode to the ski area and ate chili, as the local Firemen were having a chili feed--YUMMM!! and for a good cause, thanks, Kim. Jeff Martenson was waiting for us at the area.

A little windy on the way down and chilly up on top, but good ride.

Other riders==Ron Penner(our Leader), Kim Windsor, Geb / Christy Bailey and Dave/Dee Gormley. and Jeff.

Sunshine & Sorrows

Sending Get Well wishes for
 Christine Leach,(involved in Car accident)
 Mike Heritage,(infection in his leg), Chuck Lee(to have knee surgery) Kim Windsor(to have surgery on his leg)
 Thinking of John and Naome Stewart of Chapter E, He is the St. Mary's Hospital.

Conratulations to Grandparents, Jerry and Maryann Jordan, on the birth of a grandson on the weekend of May 2-09.

We have new members, The Woo family-Jeremy/Ana and 4 boys. WELCOME!!!

Tuesday, May 5-09

Ride to Sierra Vista, Chapter E. Left at 4:30 pm. Had 4 bikes, a little wind, but nice ride. Our purpose was to promote Ride For Kids, (for the Pediatric Brain Tumor Foundation). That is coming up on Oct. 11-09. We also visited the Honda dealer.

Saw lots of old friends and had good food. The ride home through Sonoita was so pretty with the bright moon and stars, as well as we could clearly view the bright fire in the south(south of Elgin). Always sad to have fires.

RIDERS==Garry/ Kerry Woo, Jerramy/Anna, D.W. Gary, Dave and Dee Gormly.

Hugs, Dee

Operation "Alpha" came off without a hitch! Alphie was rescued from the clutches of cute Ms Kodie. There was a tearful goodbye, and a last look over at Kodie, as Alphie was carried away by "Director Dean". (Chapter "A" had more than enough support to rally to Alphie's defense and capture him back at Chapter "K"s meeting in April.) We swept in and before Kodie could whisper sweet nothings in Alphie's ear, he was whisked away! I did hear murmurs about the possibility of the pitter patter of little Alphie's down the road. But little did they know that Alphie had been to the doctor before becoming a mascot of Chapter "A" so that there would be no unwanted little mascots in the future. I did get the strange feeling that this might not be the last time Alphie and Kodie get together. But maybe next time it will be on Alphie's turf!

Daisy Mae's Poker Run

By: Laurie Williams

The day began with a breezy departure from Chevron. This is why we think only 5 bikes and one car showed up. But it was deceiving! We got going and just got to the south side of Tucson and it was calm as could be. The ride was wonderful – cool – twisty – roads. I think that someone within the group extended his pushing it to the limit button. Not to mention names, but he drives a burgundy bike that say "Code Blue" on it. Definitely dragging pegs that day! Lots of scooters out that day- the first guy we saw on a scooter by the pecan groves was bigger-taller than the scooter – surely exceeds the limit of that poor scooter. This gave us a good little chuckle. We had five stops altogether and it looked like Geb was going to be the winner with 4 hearts but his last draw blew it – Sorry Geb. Jeannine took it with two Queens. We stopped at Gates Pass and watched the hikers climb to the top of the mountain. Then there were another group of scooters hanging out there – looked like tough guy on mopeds. Must have been a club! It was a great day to be out – so everyone was taking advantage of the last of the cooler riding weather. At Daisy Mae's Cliff & Diana met us there and we were escorted to the back room – I guess they thought we were a bunch of rowdy bikers. We all ordered ribs – yummy, yummy good! Those who attended were: Carol (Jeannine's Mom), Jeannine, Dean, Geb & Christy, Jon, Pat, Steve & I- Cliff & Diana too! Hope you will join us next time – we had great fun!

5-9-09--8AM

Bisbee Breakfast Club-ride

Beautiful ride through Sonoita and Tombstone. Then south to Bisbee, had never been to this cafe', or even in this old part of town. Food was delicious, and good service.

Thanks to Kim and Laury for sponsoring this ride for us.

The ride home was getting very warm(hot). Had lots of water to use.

We had 10 participants.

Hugs, Dee

[Buffalo Bill](#) Cody owned a mine in Oracle briefly and, in 1911, appeared as "Santa" for a group of local children. ^{[[citation needed](#)]} The community is the location of the [Biosphere 2](#) experiment and was the official residence of environmentalist author [Edward Abbey](#). Oracle is becoming a bedroom community for [Tucson, Arizona](#), but large-scale development is opposed by many residents. [Oracle State Park](#) is adjacent. The [Arizona Trail](#) passes through the Park and community Oracle is the gateway to the road up the back side of [Mount Lemmon](#). A dirt road to the summit on the "back side" of Mount Lemmon, starts here and offers a secondary route other than the [Catalina Highway](#) to the top. Follow East Mount Lemmon Road southeast off East American Avenue. This route is popular with off-road 4x4 drivers and with off-road or dual-purpose motorcyclists, but should not be attempted by regular passenger cars or street motorcycles. This road ends at the Catalina Highway near Loma Linda. The name "Oracle" comes from early prospectors. Albert Weldon came to the area looking for [gold](#) and [silver](#). He and some other companions named their first mine *The Oracle* after the ship Weldon had traveled on. The community was later named after its first mine, and thus, indirectly, after a ship. The community began to grow in the late 1870s, as gold and silver were discovered, and the Christmas and New Year mines opened. By 1880, a [post office](#) had been established. The community also became a retreat for people suffering from tuberculosis during its life. The Acadia Ranch was, during this time, a [sanitorium](#).

I've always wondered about the mystery of the sun and skin. Why is it that if you go out on a bright summer day and spend an hour in the sun, you get a sunburn? But I don't get burned if I have taken the time to get a nice gradual tan. With a nice tan you can go out in the sun and nothing happens. It doesn't make sense. What is a sunscreen? And what is a tan? What is the difference between a tan and a burn? Why can you spread a little blob of lotion on yourself and be protected, but if you forget you are miserable? All good questions that are answered on <http://www.howstuffworks.com/sunscreen.htm>. I have answered a few of these briefly below.

Why do I get sunburned?

The cells in your skin are not protected from the sun's ultraviolet radiation. You are therefore an easy target for sunburn if you spend too much time in the sun. When you get a sunburn, what you are really getting is cellular damage from ultraviolet radiation. The body responds to the damage with increased blood flow to the capillary bed of the dermis in order to bring in cells to repair the damage. The extra blood in the capillaries causes the redness - if you press on sunburned skin it will turn white and then return to red as the capillaries refill. I'll bet some of you didn't know that!

Why is it when I have a tan don't I burn anymore?

When you get a tan, what is actually happening is that the melanocytes are producing melanin pigment in reaction to ultraviolet light in sunlight. Ultraviolet light stimulates melanin production. The pigment has the effect of absorbing the UV radiation in sunlight, so it protects the cells from UV damage. Melanin production takes a fair amount of time - that is why most people cannot get a tan in one day. You have to expose yourself to UV for a short period of time to activate the melanocytes. They produce melanin over the course of hours. By repeating this process over 5 to 7 days pigment builds up in your cells to a level that is protective.

Why does sunscreen work?

Sunscreens block or absorb ultraviolet light. You can absorb UV radiation in much the same way that melanin does. The first and most common of the absorption chemicals is PABA (para-aminobenzoic acid). It absorbs UVB. All sunscreens are labeled with an SPF, or Sun Protection Factor. The SPF acts like a multiplying factor. If you would normally be OK in the sun for 10 minutes and you apply an SPF 10 sunscreen, you will be OK in the sun for 100 minutes. In order for the sunscreen to work, however, you have to apply plenty and it has to stay on. You should apply it about half an hour before going out in the sun (or the water) so it can bind to your skin - if you don't, then it is very easy for the sunscreen to wash off.

This doesn't seem that important on the surface, but we live in an area that produces a high risk for skin cancer. Skin cancer is the most common of all cancers. It accounts for nearly half of all cancers in the United States. More than 1 million cases of nonmelanoma skin cancer are found in this country each year. Melanoma is the most deadly of Skin Cancers and if not detected early can spread to other parts of your body including the liver. In 2006 there were over 62,000 cases of melanoma and 7900 deaths from the disease. Melanoma is a very serious skin cancer that can be prevented and cured. I never thought it would happen to me, but I have had 2 malignant melanoma taken off of my back. Fortunately I listened to my Mother for once and had them checked before it was too late. If you are in the sun a lot, like we are as riders, have moles, fair skin, a family history or a personal history of skin cancer, you would be at risk. Take it from me, if you have any moles that you think are suspect, that might be odd colored or growing in an atypical pattern, spend the 10 minutes to have a dermatologist check them out. It could save your life as it did for me. Here is a good site to answer your questions. <http://www.melanoma.com/diagnosing.html>

For the last 9 years I go to the dermatologist every 6 months for a full checkup of my skin. Part of my personal prevention is wearing a long sleeved shirt when I ride, a hat or a helmet. I am also a diligent user of a good sunscreen with highest SPF that I can find for my face, neck and hands. So I am constantly looking for that perfect sunscreen. Not too oily, doesn't come off with sweat or water, doesn't let every piece of road dirt stick to my face while riding and most importantly doesn't roll into my eyes to provide massive irritation. The one I am using now is the **Neutrogena Ultra Sheer Dry-Touch Sunblock with Helioplex**, the latest in UVA protection and an SPF of as high as 85. This is the number one dermatologist recommended suncare. It is non-greasy, waterproof and sweatproof. At least as much as any sunblock can be. Good sunscreen can be very expensive, but Costco used to have a **2-pack of this brand for \$13.99** that also includes a stick of lip moisturizer. That is a great buy. Another one that Mrs. C. has given me and seems to work pretty well is the **Aveeno 45 spf**.

I highly encourage everyone, and particularly in those risk categories to get checked out. Read the following links and see what to look for and then check out your spouses backs and hard to see areas for any signs of irregularities. Call your dermatologist immediately if you find something that looks suspicious. I blew it off at first thinking it couldn't happen to me, but fortunately took the time to go get checked out. If this letter helps save at least one person, like my Mom did for me, it would be worth the effort.

OUR TRIP OF A LIFETIME! (Part 3 – We're On The Road)

As the summer began to heat up, Gene and I decided it must be time to climb aboard our 1993 GL1500 Gold Wing and put some miles on the motorcycle. We left Green Valley on August 12 headed for Nova Scotia. En route we enjoyed a weekend in Colorado at the Region F Rally and then continued on through Minnesota, Canada, Maine and New Brunswick. Gene doesn't care to pull a trailer and most trips, we either stay with friends or in motels. This trip we did stay with a few friends, relatives, and spent eight nights in a motel. However, 35 of our 49 nights on the road, we had the opportunity to stay with some really great folks that belong to either the "Evergreen Club" or the "Motorcycle Travel Network". What fun to stay with "friends we just hadn't met yet."

We stayed in a cabin in the pines in New Mexico, behind the gates in old town Quebec City, in a gorgeous B&B on Prince Edward Island, had a hurricane party in New Hampshire (Hanna came calling), shared a walk-up two blocks from Harvard Square. We stayed with new friends all the way from Maine to North Carolina and then turning westward, we found even more new friends in Tennessee, Louisiana, and back in New Mexico.

We picked potatoes on Prince Edward Island and even fresh blueberries in New Brunswick. We enjoyed maple syrup in Canada, fresh mussels from PEI, lobster in Maine, a hot dog on Coney Island, crab cakes in Maryland, ham in Virginia, and sweet potato pancakes in North Carolina.

We took the ferry from St. John, New Brunswick, to Digby, Nova Scotia and found ourselves among 80 other bikers headed to Digby for their annual Wharf Rat Rally. We thrilled at the scenery on Cabot Trail and felt humble viewing the Titanic display in Halifax at the Maritime Museum. We toured Salem, found our way through the confusing streets of Boston, and then walked the Freedom Trail. As we rode through Central Park, I got the greatest picture of a horse with purple glitter painted hooves! One of Gene's most exciting rides came next; down Broadway past Times Square on our way to visit the Statue of Liberty.

We managed to fit in Washington, D.C., the Blue Ridge Mountains, Shenandoah Valley, Monticello, and the Biltmore. On our way to Tennessee, we drove through the south end of the Great Smokey Mountains and Gene conquered "The Tail of the Dragon", an 11-mile stretch of road with 381 curves. It was a WOW! After that, we toured the Grand Ole Opry and rode the Natchez Trace. We stopped to visit Vicksburg and then headed home via Louisiana, Texas, Oklahoma, and New Mexico. September 30 found us home safe and sound (??) after 10,630 miles! I'll say it again...

It was our trip of a lifetime!
